APPENDIX TO NINETEENTH REPORT OF THE
GEOGRAPHIC BOARD OF CANADA

CATALOGUE OF
MAPS OF CANADA

PUBLISHED BETWEEN
JANUARY 1, 1925 and JULY 31, 1927

SUPPLEMENT No. 2 TO CATALOGUE OF THE MAPS IN
THE COLLECTION OF THE GEOGRAPHIC BOARD, 1922

INTRODUCTION

A catalogue of modern Canadian maps was published by the Geographic Board in 1922 and a supplementary catalogue in 1925. A second supplement is now published listing maps which have appeared since January 1, 1925. The selection includes the more important maps published by the various departments of the Federal and Provincial Services, whether they are entirely new or are revised editions of older maps.

The catalogue is in six divisions. Maps covering territory exceeding 400 miles in length or breadth are classified as Dominion. The others are arranged by provinces.

The origin of the maps is indicated generally by one of the letters used in the earlier publications, as follows:—

N—Department of the Interior, Ottawa.

G—Geological Survey, Department of Mines, Ottawa.

M—Department of National Defence, Ottawa.

C—Charts issued by Canadian Hydrographic Survey, Ottawa, the British Admiralty (distributor—J. D. Potter, 145 Minorities, London, England), and the United States Lake Survey, Detroit.

D—Maps issued by Provincial Governments, and all other maps.

The Geographic Board has no maps for distribution, and application for copies should be made to Ottawa to the departments publishing the maps as indicated above. Where a more precise address is necessary it is given in brackets following the title of the map. Enquiries for charts, unless it is otherwise stated, should be addressed to the Canadian Hydrographic Survey, Ottawa.

The following catalogues have been used in selecting maps for this collection:—

List of Maps and Publications issued by the Topographical Survey of Canada, Department of the Interior, Ottawa.

Publications of the Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Annual Reports of the Department of Mines, Ottawa.

Catalogue of official Canadian Government Publications of use to Mariners. Department of Marine and Fisheries, Ottawa.

Catalogue of Admiralty Charts, Plans, and Sailing Directions. The Lords Commissioners of the Admiralty, London, England.

Survey of Northern and Northwestern Lakes. United States Lake Survey Office, Detroit, Michigan.

Catalogue of Charts, Plans, Sailing Directions, and other Publications of the United States Hydrographic Office. Department of the Navy, Washington, D.C.

List of Maps. British Columbia. Lands Department, Victoria.

List of Publications including Reports, Maps and Bulletins. Ontario Bureau of Mines, Toronto.

List of lithographed Maps and Plans. Department of Lands and Forests, Toronto, Ontario.
